- One to one conversations
- Text messaging

TWO WAY RADIO SOLUTIONS THAT WORK FOR YOUR BUSINESS

FreedomLINK is a digital two-way radio system specifically designed to meet the requirements of organizations/industries that require a customizable business-critical communication solution using licensed radio spectrum. FreedomLINK is a complete two-way radio system that includes portable and mobile radios, accessories as well as powerful data applications, such as text messaging and location services. It combines exceptional two-way radio functionality with digital technology to deliver increased capability and spectral efficiency, integrated data applications and enhanced voice communications. In the ongoing effort to improve workforce productivity and operational effectiveness, organizations need to communicate with and provide information to employees anywhere on 24/7 basis-easily and cost effectively. This is especially important for organizations or enterprises whose workers are mobile—moving about a geographic area to accomplish their job.
