

MOBILE RADIOS

Mobile Two-Way Radios are vehicle-mounted wireless devices that are used to send voice or data messages one-to-one or one-to-many over radio frequencies within a local area, city, or state. They are often installed on the dash of a vehicle, and run off of its power source. These rugged radios are engineered to withstand harsh conditions, and the powerful audio output penetrates noisy environments, providing clear, crisp audio at full volume.

DM588 DIGITAL MOBILE RADIO

- Compact, Sophisticated, and Stylish
- Analog and Digital Dual Mode
- 25 Watts UHF or VHF
- Display Provides Private Call, Caller ID, and Text Message
- ARC4/DMR Standard 40-bit Encryption & up to 256-bit Capable
- Pseudo Trunking Capable

- Callboxes

KIRISUN INFORMATION

Initially established in 1986, Kirisun Communication Co., Ltd is a fully independent company operating its own sales, R&D and manufacturing divisions, with distribution to its major domestic market, as well as to a global market today.

Ranked among the leading industry brands, Kirisun brings exacting standards of innovation, quality and excellence to its professional radio terminals and system solutions, providing integrated communications solutions for carrier and private networks. Our products portfolio offers a winning combination of quality and value, which is why, Kirisun has accumulated its loyal customer relations worldwide over the past years.

Our manufacturing facility is 100% owned and directed from Kirisun headquarters, occupied around 20,000 square meters in QuanZhou, operating internationally recognised TUV ISO9001: 2015 quality criteria. The maximum production capacity is nearly 1.2 million per year, together with rigorous and uncompromising quality controls, Kirisun has won the leading Outstanding Enterprise award from local government.

Kirisun invests about 15% of its revenues each year in R&D to promote innovation of technology and products. It has established R&D centers in Shenzhen, Beijing, Guangzhou, Quanzhou in China, as well as in the United Kingdom to support innovation and development of the company. Meanwhile, Kirisun catches up with current opportunities, and has established a strong and capable talented team, laying a solid foundation for independent innovation. Kirisun has a well-established distribution network covering all over China and more than 80 countries in the global market.

- Large Color Display
- Analog and Digital
- 4 Watts UHF or 5 Watts VHF
- Roaming
- Pseudo Trunking
- GPS Option
- Supports DMR Tier III
- MIL-STD-810 C/D/E/F/G and IP68
- 3 year warranty

FreedomLINK+ Nationwide Coverage

FreedomLINK+ uses nationwide networks, so you get fantastic coverage without having to deploy complicated and expensive radio infrastructure. Never be constrained by capacity. Each radio has the ability for many individual channels for group calling, each capable of supporting more than 2,000 participants. We offer a simple Gateway/Bridge to connect your two-way radios to other radio manufacturer's products. In no time you can be set up and communicating on the same TalkGroup your current two-way radio system is using.
